Subject: RE: Final DB QAPP

Hi all
In reviewing the Final QAPP it doesn't appear my comments were included. If the intent is to allow the variability between test chambers just let me know. There was another error elsewhere that wasn't corrected and there's still the concern of over handling the organisms with the pipettes. Would you like me to resend my last set of comments? I let Burt know a couple weeks ago that I would be out the week of June 6 so if I am needed as a back-up or to help out the sampling date will need changing. Please advise.....

Stephanie

Hi Stephanie,

Samples will be collected June 6th as per the message. I'm told that Burt will be doing the larvae work here. Were you able to confirm this and does he need a backup?

Thanks,
Barry

Subject: Final DB QAPP

Good Morning Everyone,

Attached is the draft final DB QAPP. If you wish to backcheck your comments, please do so by COB Tuesday May, 30 and send your redlines directly to me. In the meanwhile, OERA admin will format the document and finalize appendices. We are looking forward to field sampling and toxicity testing on June 6.

I will complete an Analytical Services Request form for the shell metals analysis so appropriate folks should be seeing that soon.

Thank you all for your help with this project, Brenda
